DESCRIPTION OF THE WORK DONE IN BRIEF

1. • Learning jQuery Concepts:

- Introduction to jQuery library and its advantages in simplifying JavaScript code and DOM manipulation.
- Explanation of key jQuery concepts such as selectors, events, effects, animations, and AJAX.
- Demonstration of how to use jQuery to manipulate DOM elements, handle events, and perform common tasks more efficiently.
- Provide examples and tutorials for further learning and practice with jQuery.

2. JavaScript Tasks using jQuery:

○ Task 1: Implementing Tasks with jQuery

1. This task involves implementing the functionalities described in the previous week's tasks (e.g., static table manipulation, checkbox manipulation, row deletion, etc.) using jQuery. jQuery simplifies DOM manipulation and event handling, making it easier and more efficient to achieve these tasks compared to plain JavaScript.

○ Task 2: Enhancing Character Limit Feature with jQuery

1. In this task, you'll enhance the character limit functionality implemented in the textarea from the previous week using jQuery. jQuery can be used to dynamically update the character count as the user types in the textarea, providing a more interactive and responsive user experience.

○ Task 3: Improving Select Dropdown Menu with jQuery

1. For this task, you'll improve the functionality of the select dropdown menu implemented in the previous week using jQuery. jQuery can be used to dynamically enable/disable options based on user actions, add new options dynamically, and set the first option as selected programmatically. This enhances the usability and flexibility of the select dropdown menu.
